# Attribute Activation and Identification

Attribute	Activation	Identification
Altered	CTRL+ G or via page level validation window.	Green Label
Blank*	CTRL+ B or via page level validation window.	Bold Label
Unreadable*	CTRL+ U or via combination level validation.	<u>Underline Label</u>
Failed mask**	System Driven	Italic Label
Altered and blank	Both attributes activated separately as previously mentioned.	Green and Bold
Altered and unreadable	Both attributes activated separately as previously mentioned.	<u>Green and Underlined</u>
Altered and failed mask	Both attributes activated separately as previously mentioned.	Green and Italic
<p>* Usage: System will not allow user to tag a field as blank or unreadable if there is data in the field. Likewise, the system will remove existing blank and unreadable tags from a field if a user enters data into the field. Allow users to switch between Blank and Unreadable without warning.</p> <p>** Usage: System will check mask fields upon exit and automatically set this attribute to FM or not FM. User can not modify this attribute.</p>
